

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

	PAGE
The morphology of <i>Araucaria brasiliensis</i> (with plates I-III) - - - - -	<i>L. Lancelot Burlingame</i> 1
The archegonium of <i>Sphagnum subsecundum</i> . Contributions from the Hull Botanical Laboratory 199 (with plates IV-VII) - - - - -	<i>George S. Bryan</i> 40
Additional evidence of mutation in <i>Oenothera</i> (with seventeen figures) - - - - -	<i>Harley Harris Bartlett</i> 81
The embryo sac and embryo of <i>Striga lutea</i> (with plates VIII and IX) - - - - -	<i>Margaret R. Michell</i> 124
The origin of the inflorescences of <i>Xanthium</i> (with plate X) - - - - -	<i>Clifford H. Farr</i> 136
The visible effects of the Schumann rays on protoplasm - - - - -	<i>W. T. Bovie</i> 149
Flower of <i>Adenocaulon bicolor</i> (with plates XI and XII) - - - - -	<i>Jessie A. Ayres</i> 154
The coefficient of mutation in <i>Oenothera biennis</i> L.	<i>Hugo DeVries</i> 169
Growth studies in forest trees (with plates XIII and XIV and two graphs) - - - - -	<i>H. P. Brown</i> 197
Extreme alterations of permeability without injury (with four figures) - - - - -	<i>W. J. V. Osterhout</i> 242
The alpine and subalpine vegetation of the Lake Tahoe region (with four figures) - - - - -	<i>F. J. Smiley</i> 265
On the male gametophyte of <i>Picea canadensis</i> . Contributions from the Hull Botanical Laboratory 200 (with plates XV-XIX and one figure)	<i>A. H. Hutchinson</i> 287
Studies in the genus <i>Bidens</i> . II. Contributions from the Hull Botanical Laboratory 201 (with three figures) - - - - -	<i>Earl E. Sherff</i> 301
On the decrease of permeability due to certain bivalent kations (with eleven figures) - - - - -	<i>W. J. V. Osterhout</i> 317
Branching in the Ophioglossaceae. Contributions from the Hull Botanical Laboratory 202 (with plates XX-XXI and six figures) - - - - -	<i>Loren C. Petry</i> 345
Variations in respiratory activity in relation to sunlight (with ten figures) - - - - -	<i>H. A. Spoehr</i> 366

	PAGE
The medullary rays of <i>Cedrus</i> (with seven figures)	<i>M. A. Chrysler</i> 387
Microtechnical methods. Contributions from the Hull Botanical Laboratory 203 - - -	<i>W. J. G. Land</i> 397
Effect of moisture content of a sandy soil on its nitrogen fixing power - - - <i>C. B. Lipman</i> and <i>L. T. Sharp</i> 402	
A study of delayed germination in economic seeds. Contributions from the Hull Botanical Laboratory 204 (with one figure) - - - -	<i>Dean H. Rose</i> 425
Specific action of organic compounds in modifying plant characteristics; methyl glycocoll versus glycocoll (with four figures) - <i>Oswald Schreiner</i> and <i>J. J. Skinner</i> 445	
The effect of some trivalent and tetravalent kations on permeability (with seven figures) - - -	<i>W. J. V. Osterhout</i> 464
Physiological isolation of types in the genus <i>Xanthium</i> (with seven figures) - - -	<i>Charles A. Shull</i> 474
The origin and distribution of the family Myrtaceae	<i>Edward W. Berry</i> 484
Growth and colloid hydration in cacti (with two figures) - - - - - - - -	<i>Esmond R. Long</i> 491
BRIEFER ARTICLES—	
Apogamy in <i>Nephrodium hertipes</i> - - - -	<i>W. N. Steil</i> 254
Notes on orchids (with one figure) - - - -	<i>T. D. A. Cockerell</i> 331
Evidence for the general distribution of oxidases in plants - - - - - - - -	<i>G. B. Reed</i> 407
CURRENT LITERATURE - - - - - - -	57, 158, 256, 334, 410, 498
For titles of book reviews see index under author's name and reviews	
Papers noticed in "Notes for Students" are indexed under author's name and subjects
